

OPTIX collection

SAMUEL & SONS

KINETIC appliqué border

a series of end to end trapezoids make up an undulating pattern conveying motion in this 2" border available in colors Charcoal, Cortado and Jet.

QUADRATIC appliqué border

is constructed of squares created by the assembly of four folded foils whose varied planes combine with its inner angles to reveal a diamond of negative space within the centers. The design is enhanced by horizontal and vertical lines of tonal stitching.

Kinetic Appliqué Border in Charcoal*

OPTIX

Optix is a sophisticated collection of appliquéd, geometric borders incorporating origami folding techniques articulated through a contemporary palette of neutrals. Individual translucent acrylic foils are folded and yield components with various planes. These components are then assembled into patterns and appliquéd onto twill borders using tonal accent stitching. This results in three dimensional geometric designs whose structure comes from the various angles created by the foil folds in conjunction with the overall pattern created when they are combined.

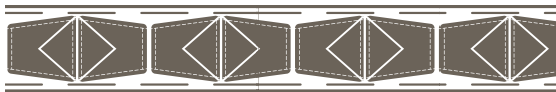

Elliptic Appliqué Border in Frost

ELLIPTIC appliqué border

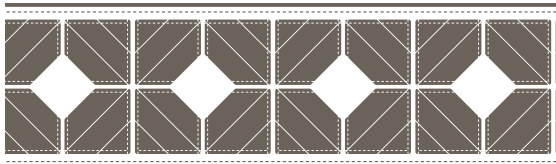

is composed of a series of ovals, each fastened in the center while edges extend from the surface accentuating the true dimensionality of this design. The Elliptic border is offered in light shades of Frost, Chamois and Stone. It will be exquisite along the leading edge of a drapery or embellishing a valance.

Optix Collection

BT-57203 2" (50mm) Kinetic Appliqué Border

Available in: Charcoal, Cortado, Jet

BT-57204 3.9"(98mm) Quadratic Appliqué Border

Available in: Frost, Chamois, Stone, Charcoal, Cortado, Jet

BT-57202 2.5" (64mm) Elliptic Appliqué Border

Available in: Frost, Chamois, Stone
